Notice of Fire Incident at Our Supplier's Plant

We regret to inform you that a fire broke out at NITTAN Corporation's Horiyamashita plant, a supplier of intake and exhaust valves and valve seats, at the end of December 2023. The fire damaged the manufacturing equipment, and the production and supply of these parts have been suspended.

As a result, there is a possibility that the delivery of some repair parts and engine units will be delayed. We sincerely apologize for any inconvenience this may cause.

We are currently doing our utmost to resume production as soon as possible. We will keep you updated as soon as we have any new information.

We appreciate your understanding and cooperation.
